How to shop for mortgages without dings on my credit?

I want to shop for mortgages for a new house without them needing to run my credit every time since having my credit run negatively impacts my credit (why is that anyway?).

How should I go about shopping for mortgages to get the best rates, lowest fees and best overall package?

Your best bet is to go to a mortgage broker then. He can pull one credit report and find the best lender for your situation. Just be careful so you don't get ripped off on fees.
