# **What is a good online home mortgage loan company?**

Looking to apply online to see if I prequalify, I walked into Citibank but they say they are too busy and are ignoring me.

Fortunately, the internet has made the loan-finding process quick and easy. Some things to consider before you start your loan process is knowing what your credit score is and how much you can afford to borrow. The better your credit score is, the more likely you will be able to get a better rate. Also, knowing how much you can afford prior to beginning the mortgage process will help you narrow down the field so you don't waste time looking at homes that are out of reach.

LendingTree is a free service which connects qualified borrowers to lenders. After completing a secure online request, you can receive up to four offers from lenders. You can then compare mortgage rates and terms for each loan, and can choose the loan that best suits your needs.

If you choose not to use LendingTree, it's smart to compare multiple offers from a variety of lenders. More options to choose from can translate into savings. Make sure you fully understand the terms and details of the loan, and don't hesitate to ask questions!

If you need more information before you start, check out LendingTree's expert home loan tips or try a mortgage calculator below:
