**How intelligent is anyone who thinks  
excessive government interference caused  
this economic depression?**

You know, the one caused by unregulated financial institutions who did what unregulated industries always do in capitalism - create a crisis.

If we had not allowed banks to sell mortgages to third parties, we would never have had this depression. They did not guarantee any bank's loans, you silly person.

My point is, the more you regulate financial services, the less problems you'll have.

that's right, illegal immigrants with credit cards caused a global economic depression! Don't forget about fluoride in the drinking water, you dingbat!

very Intelligent as it is well known that the government deregulated under Billy Cigar Smoking Clinton, and it has always been the democrat party's position to reward incompetence
